General Electric Co., Rome, Georgia; Notice of Revised Determination on Reopening

On July 5, 1995, the Department, at the request of the petitioners, reopened its investigation for workers producing medium transformers at the subject facility. The initial investigation resulted in a negative determination. The notice was published in the **Federal Register** on May 25, 1995 (60 FR 27794).

The Department had issued a negative determination in the subject case because criteria (3) and (4) of the group eligibility requirements in paragraph (a)(1) of Section 250 of the Trade Act of 1974, as amended, were not met. Imports of medium transformers from Mexico or Canada did not contribute importantly to worker separations at the General Electric Company, Rome, Georgia facility, and there was no shift in production to Mexico or Canada.

The petitioners had alleged a shift in production by the subject firm to Mexico. An intent to outsource some production had been announced, but a final decision had not yet been made. New findings on reopening show that on June 12, 1995, General Electric Company ratified an agreement to shift some production of transformers to Mexico.

Other findings show that sales, production and employment decreased
